

Hello!

My name is EJ(Ejay) Cho, I am a Product Designer

Location Melbourne, Australia
LinkedIn [linkedin.com/in/eunjicho](https://www.linkedin.com/in/eunjicho)
Portfolio Portfolio available on request

01 PROFILE

Product Designer with 9+ years of experience across e-commerce, SaaS, retail and digital products. I enjoy understanding how customers use products — where they struggle, what they need, and how design can make complex experiences simpler and more intuitive. I work across end-to-end product design, UX/UI, interaction design and design systems, balancing customer needs with business goals and using research, data and experimentation to validate solutions. I partner closely with Product, Engineering and business teams to turn complex problems into clear, scalable experiences.

02 CORE SKILLS

Product Design • UX/UI Design • Interaction Design • Design Systems • E-commerce • Experimentation & A/B Testing • Customer Research • Prototyping • Visual Design • Figma

03 EXPERIENCE

Aug 2021 – Sep 2026	Product Designer <i>Kmart Australia Limited</i> Melbourne, AU Product Designer working across Kmart and Target Australia, designing customer-facing e-commerce and service experiences in partnership with Product, Engineering and business teams. Also contributed to design system governance, helping establish clearer processes for component contribution and ongoing system development. Target Australia - Checkout & Conversion — Led the end-to-end redesign of Target's checkout experience, exploring a simplified single-page journey and rethinking when delivery selection and availability validation should happen earlier in the purchase flow. Also designed and supported PayPal Express Checkout, alongside sign-in/sign-up improvements and checkout experimentation. - Fulfilment & Delivery — Designed end-to-end fulfilment experiences for new propositions including Uber Direct three-hour delivery and Uber Eats marketplace integration, covering customer-facing e-commerce messaging and the full store team workflow for receiving and actioning fulfilment requests. - Product Discovery & Merchandising — Proposed redesigned PLP product tile and badge patterns to improve product information hierarchy and consistency. Used user interviews and preference research to inform badge design, and A/B testing to evaluate customer preferences for the Add to Cart experience. - PDP Experience — Redesigned the “How to Get It” experience to help customers understand delivery and collection options, and led A/B test planning across PDP elements including size selection, product quality and social proof badges to evaluate their impact on customer decisions. - Data & Experimentation — Used analytics, funnel metrics, customer research and A/B testing to identify opportunities, validate design decisions and understand customer and business impact. Contributed to a FY25 portfolio of initiatives delivering approximately \$15M in annualised value. Kmart Australia - Help Centre & AI — Conducted discovery research into customer support behaviour and developed a new Help Centre concept to address a fragmented FAQ and chatbot experience, including AI-powered FAQ summaries and context-aware chatbot entry points informed by purchase history.
------------------------	---

- Team Member App — Designed new service journeys for team members accessing customer purchase and request history, working through complex scenarios including multiple parcels, line-item cancellation and shipping refunds.
- Search & Product Discovery — Redesigned Kmart Search and introduced a new zero-state search experience to make product discovery clearer and easier to navigate.
- Authentication — Designed Passkey biometric login and SSO experiences, contributing to a 300% increase in daily sign-ups.

Design Systems Governance — Task Force Lead

- Led the governance workstream of a cross-functional Design System task force, establishing a clear process for designers to contribute and publish new components.
- Interviewed designers and developers to identify pain points and gaps in the existing design system, and synthesised findings to inform governance and improvement priorities.
- Worked across Design and Engineering to explore a more consistent and scalable approach to design system contribution and maintenance.

EARLIER EXPERIENCE

Aug 2019 – Jan 2020

UI Designer *Conduct*

- Designed mobile and web applications for clients including Monash University, Victorian Electoral Commission and Victoria Racing Club.

Apr 2018 – Jul 2019

Product Designer *Loop11 / Usability One Pty Ltd*

Product Designer for Loop11, an online usability testing platform.

- End-to-end Workflow Redesign — Redesigned the user testing workflow from test setup through participant experience and results, using low- and high-fidelity prototypes.
- B2B SaaS UX — Simplified complex workflows and interactions to improve usability across the product.
- Design System — Created and established an internal design system to improve UI consistency and support scalable product development.

Jan 2016 – Dec 2017

Product Designer *Stibee*

- Early product team member owning end-to-end product design for a B2B email marketing platform, including the dashboard, newsletter editor, interactive marketing reports, and offline event and marketing collateral.
